Join us for a seminar on the

DEVELOPMENT OF SUSTAINABLE LABORATORY EQUIPMENT MANAGEMENT PROGRAMS

“Strengthening local capacity in Biomedical Technology to support quality HIV diagnostics and viral suppression”

Please join the American International Health Alliance and the Association of Public Health Laboratories with partners from the Ministries of Health of Kenya, Uganda, and Zambia and the U.S. Centers for Disease Control and Prevention for an in-depth discussion on our PEPFAR-supported work establishing sustainable lab equipment management training and mentorship programs. Topics include developing in-service training and mentorship programs, establishing national laboratory equipment calibration centers, developing national equipment guidelines, and biological cabinet calibration and certification programs.
