ASLM2018 Satellite Session

The ASLM Laboratory Community of Practice (LabCoP) Symposium

Sunday, 9 December 2018  |  8:00 – 17:00

Transcorp Hilton
Niger/Enugu Rooms

Following the LabCoP Face-toFace Uganda meeting the ASLM LabCoP team is organizing this special ASLM2018 LabCoP session to assess the progress made by each country in finalizing their action planning process, and securing funding for their action plans or integrating their action plans into their country operational plans (COP planning) or Global Fund programing or reprogramming cycles. LabCoP also wants each country to develop an implementation plan for the agreed activities. Furthermore, the LabCoP team will document best practices that exist in each of the LabCoP participating countries, which other countries can adopt. By documenting best practices and where they can be found for each part of the HIV viral load (VL) cascade, LabCoP will facilitate south-to-south exchanges among member countries and promote peer-to-peer technical assistance.

This session is sponsored by ASLM and the Bill and Melinda Gates Foundation
